

SUPERSPERSE® DRY is a desiccated multifunctional dispersant and wetting agent in powder form. It is easily dissolved in water and can be used in both liquid and dry applications.

Benefits: **SUPERSPERSE® DRY** can be used in dry blend formulations which require mixing with water prior to application. It will improve the wetting of the solid dry particles in the blend. Affected particles include pigment, sand, cement and fibers, as well as special effect chips and specks.

Due to **SUPERSPERSE® DRYs** accelerated wetting properties of pigments and fillers, additional benefits include more uniform color strength development, system stability and resistance to color float.

Applications: **SUPERSPERSE® DRY** is widely used in traditional wet paint, ink and caulk systems. It is also used in the manufacture of pigment dispersions as it is an effective pigment wetting and dispersion additive for both inorganic and organic pigments. It can also be used in the following:

- Mortars
- Joint fillers
- Plasters
- Leveling compounds
- Pigment-powder blends

Typical Properties:

Percentage Active Solids	95%
Color	Amber
Form	Powder
Weight per Gallon (lbs)	5.4
Nature	Anionic
